

City of Cypress Water Quality Checklist for New Development and Significant Redevelopment Projects

Project Name: _____

Project Location: _____

Project Description: _____

Planning Priority Projects Subject to a WQMP	YES	NO
1. New development projects that create 10,000 square feet or more of impervious surface. This category includes commercial, industrial, residential housing subdivisions, mixed-use, and public projects on private or public property that falls under the planning and building authority or the Permittees.		
2. Automotive repair shops. This applies to facilities that are categorized in any one of the following Standard Industrial Classification (SIC) codes 5013, 5014, 5541, 7532-7534, and 7536-7539.		
3. Restaurants where the land area of development is 5,000 square feet or more including parking area. This category is defined as facilities that sell prepared foods and drinks for consumption, including stationary lunch counters and refreshment stands selling prepared foods and drinks for immediate consumption (SIC code 5812).		
4. Impervious surface of 2,500 square feet or more located within, directly adjacent to (within 200 feet), or discharging directly into receiving waters within Environmentally Sensitive Areas (ESAs).		
5. Parking lots 5,000 square feet or more including associated drive aisle, and potentially exposed to urban stormwater runoff. A parking lot is defined as a land area or facility for the temporary parking or storage of motor vehicles used personally, for business, or for commerce.		
6. Streets, roads, highways, and freeways. This category includes any paved surface that is 5,000 square feet or greater used for the transportation of automobiles, trucks, motorcycles, and other vehicles. (See discussion under (Section 7.II-1.5 relative to public projects).		
7. All significant redevelopment projects, where significant redevelopment is defined as the addition or replacement of 5,000 or more square feet of impervious surface on an already developed site. Redevelopment does not include routine maintenance activities that are conducted to maintain original line and grade, hydraulic capacity, original purpose of the facility, or emergency redevelopment activity required to protect public health and safety. If the redevelopment results in the addition or replacement of less than 50 percent of the impervious area on-site and the existing development was not subject to WQMP requirement, the numeric sizing criteria discussed in Section 7.II-2.0 only applies to the addition or replacement area. If the addition or replacement accounts for 50 percent or more of the impervious area, the Project WQMP requirements apply to the entire development.		
8. Retail Gasoline Outlets (RGOs). This category includes RGOs that meet the following criteria: (a) 5,000 square feet or more, or (b) a projected Average Daily Traffic (ADT) of 100 or more vehicles per day.		

All development projects which do not fall under one of the Priority Planning Projects identified above, and which require discretionary approval by the Cypress Planning Division, shall be required to complete a Non-Priority Water Quality Management Plan Checklist.

Planning Priority Project If any question is answered "YES", the project is a planning priority project subject to the Development Planning Program of the LIP and will require post development storm water quality mitigation, either WQMP or site-specific.

Planning Exempt Project If every question is answered "No", the project is exempt from the Development Planning program but must still submit the "Owner's Certification of Compliance with Minimum Requirements" and comply with construction requirements.

One Acre or Greater Project If the project is one acre or greater, the project is subject to the General Construction Permit, requiring a NOI, SWPPP and "Owner's Certification of Compliance.

"Best Management Practice (BMP)" means methods, measures, or practices designed and selected to reduce or eliminate the discharge of pollutants to surface waters from point and nonpoint source discharges including storm water. BMPs include structural and non structural controls, and operation and maintenance procedures, which can be applied before, during, and/or after pollution producing activities.

"Hillside" means property located in an area with known erosive soil conditions, where the development contemplates grading on any natural slope that is twenty-five percent (25%) or greater.

"Numerical Design Criteria – For information regarding numerical design criteria, refer to the 4th term Permit Technical Guidance Document, which can be found on the Orange County's Watershed website at: <http://www.ocwatersheds.com/>.

Redevelopment" means (a) land-disturbing activity that results in the creation, addition, or replacement of 5,000 square feet or more of impervious surface area on an already developed site. Where Redevelopment results in an alteration to **more than 50%** of impervious surfaces of a previously existing development, and the existing development was not subject to post development storm water quality control requirements, the entire project must be mitigated. Where Redevelopment results in an alteration to **less than 50%** of impervious surfaces of a previously existing development, and the existing development was not subject to post development storm water quality control requirements, the alteration must be mitigated, but not the entire development (b) Redevelopment does not include routine maintenance to maintain original line and grade, hydraulic capacity, or original purpose of a facility, nor does it include emergency construction activities required to immediately protect public health and safety.
